

QUEEN MARGARET'S SCHOOL

DUNCAN | BC

BRITISH COLUMBIA LEED CERTIFIED

The Junior School is a newly constructed LEEDS designated "green" building. The floor plans were designed in conjunction with input from the Vision 2008 Committee who spent countless hours consulting and visiting other schools to determine what would best suit the needs of Queen Margaret's students. Two Aermec ANK1517HA Heat Pumps were installed. The result is a Junior School that retains many of the comforts of a small school but with additions of larger classrooms and new specialized classrooms which enhance the students learning experience. The 20,000 square foot Junior School is an exciting milestone in the school's evolution.
