

# WEBSTER NAVY AIR FORCE BASE

PATUXENT RIVER | MD

## ENERGY SAVINGS

Located 12 miles southwest of the Naval Air Station Patuxent River, the 1000-Acre Webster Outlying Field annex is home to the Naval Air Warfare Center Aircraft Division (NAWCAD) 4.5 and NAWCAD 5.1.11, Coast Guard Station St. Inigoes, and a component of the Maryland Army National Guard. In 2014, the U.S. Navy awarded CEG a federal ESPC project for Naval Air Station Patuxent River at the Webster Outlying Field Annex, a secure research facility and active airfield. CEG will upgrade 72 buildings across Webster Outlying Field and will implement five major energy conservation measures.

CEG will install new control systems and Ground Source Heat Pumps to replace existing oil-fired boilers and air source chillers in five of the largest buildings at the base. Across the base, CEG will upgrade the interior and exterior lighting, building controls, domestic water fixtures, and building envelopes.
